

GUITAR

Tube Driven Effect Pedals

The DRAGON Series Overdrive and Distortion Effect Pedals feature Class A circuitry design to deliver high quality tube sound that cannot be duplicated by solid state (transistor) type effect pedals. Ideal for use in pop, hard rock, shredding and blues music, the Dragon Series pedals offer an original cir-

cuitry design to provide unsurpassed tone enhancement along with a robust stainless steel chassis to provide years of use. The TRUE BYPASS relay circuitry eliminates tone and signal loss to your amp when the effects are switched off.

DRAGON DISTORTION

- Class A Tube Circuitry Designed Distortion Effect Pedal
- 2 x 12AX7A tubes
- Gain, Tone, Volume Controls
- TRUE BYPASS circuitry
- LED on indicator
- Low noise 12V DC / 350mA power supply

DRAGON OVERDRIVE

- Class A Tube Circuitry Designed Overdrive Effect Pedal
- 2 x 12AX7A tubes
- Gain, Tone, Volume Controls
- TRUE BYPASS circuitry
- LED on indicator
- Low noise 12V DC / 350mA power supply

ACCESSORIES

Midi pedal boards and accessories to enhance your performances

Cicognani offers a range of useful accessories to enhance and optimize your performances.

Our Midi pedal boards are especially designed to be

used with our Imperium Series Guitar Amps, the INDY 800H Bass Guitar amplifier and the Indy Bass Guitar Preamp to allow you to control your customized presets

in both live performance and studio applications. All Cicognani Accessories are manufactured utilizing the highest quality components to ensure years of use.

THE MIDI FOOTSWITCH

Midi Pedal Board

- Midi footswitch board with 127 presets
- 10 selectable latching type metal switches with LED on indicators
- Bank Up/Down latching type metal switches
- Display with easy to read numbers for presets
- Dipswitch to select set the midi transmission channel (1 to 16)

- Quick Recall of the last preset
- Midi slave aux output
- 9V-15V DC out @ 300mA provides power for an effect pedal
- Can be powered by a 9-15V DC 300ma power supply or by external phantom power via the midi slave input with a midi cable

MF24

Compact Midi Pedal Board

- Compact sized Midi footswitch board with 24 presets
- 4 selectable latching type metal switches with LED on indicators
- Bank Up/Down latching type metal switches
- Display to view the selected bank

- Quick Recall of the last preset
- Midi slave aux output
- 9V-15V DC out @ 300mA provides power for an effect pedal
- Can be powered by a 9-15V DC 300ma power supply or by external phantom power via the midi slave input with a midi cable

POWER LOAD

- Handles 50 watts musical power at 8ohms
- Provides a dummy load allowing use of amp heads without a speaker cabinet
- Passive filtered recording line out with microphone emulation of a 4 x 12"

- cabinet equipped with vintage speakers: for direct input recording to a mixer or direct input to a P.A. system
- Variable Record out level control
- Clipping LED to display overloaded input signal

SMART MIKE

Adjustable Microphone Boom Stand

- SMART MIKE: adjustable boom microphone stand for the Brutus and Imperium Guitar Speaker Cabinets
- Eliminates the need for a

- floor type mic stand and stage clutter
- SMART MIKE provides precise microphone placement
- Attaches easily & quickly
